

Technical support for capacity building and improvement of the LULUCF inventories: plans for the upcoming year

JRC LULUCF workshop 2022

Anu Korosuo / JRC, 20 June 2022

Overview of the plans

- Part of an administrative arrangement between JRC and DG CLIMA; supported by external experts
 - **Roundtable discussions with the Member States**
 - **Country visits for bilateral/multilateral assistance**
- Will run in parallel with a project managed by the EEA

Objectives

- Improved inventories
 - Compliance with Reg. 2018/841 and 2018/1999
 - Better understanding of needs to improve monitoring under enhanced climate targets
- Enhanced collaboration and co-learning between the Member States
 - Identification of common issues between different MS LULUCF inventories
 - Roundtable meetings to help to know each other, and to discuss problems and their solutions

Planned set-up of the project

- **Roundtable discussions**
 - Thematic sub-groups based on relevance of the topic, geographical region, data availability etc.
- **Bilateral assistance** to selected MS on specific topics
- **JRC workshops** in 20-21 June 2022 and in June 2023

Possible topics

- Reporting of dead wood
- Key pools in key categories to be reported with at least Tier 2
- Land use conversions to be reported using geographically-explicit data

- **Issues identified by the Member States**

Preliminary timeline

- Please send feedback on preferred topics and working modalities to anu.korosuo@ec.europa.eu by 30 June
- **Workshops/roundtable meetings (indicative):**
 - Monthly, from September onwards
 - Bilateral visits: upon agreement
- **End of this project: next JRC workshop in 2023**

Thank you!
