

The Czech LULUCF inventory: current concerns and issues

Emil Cienciala

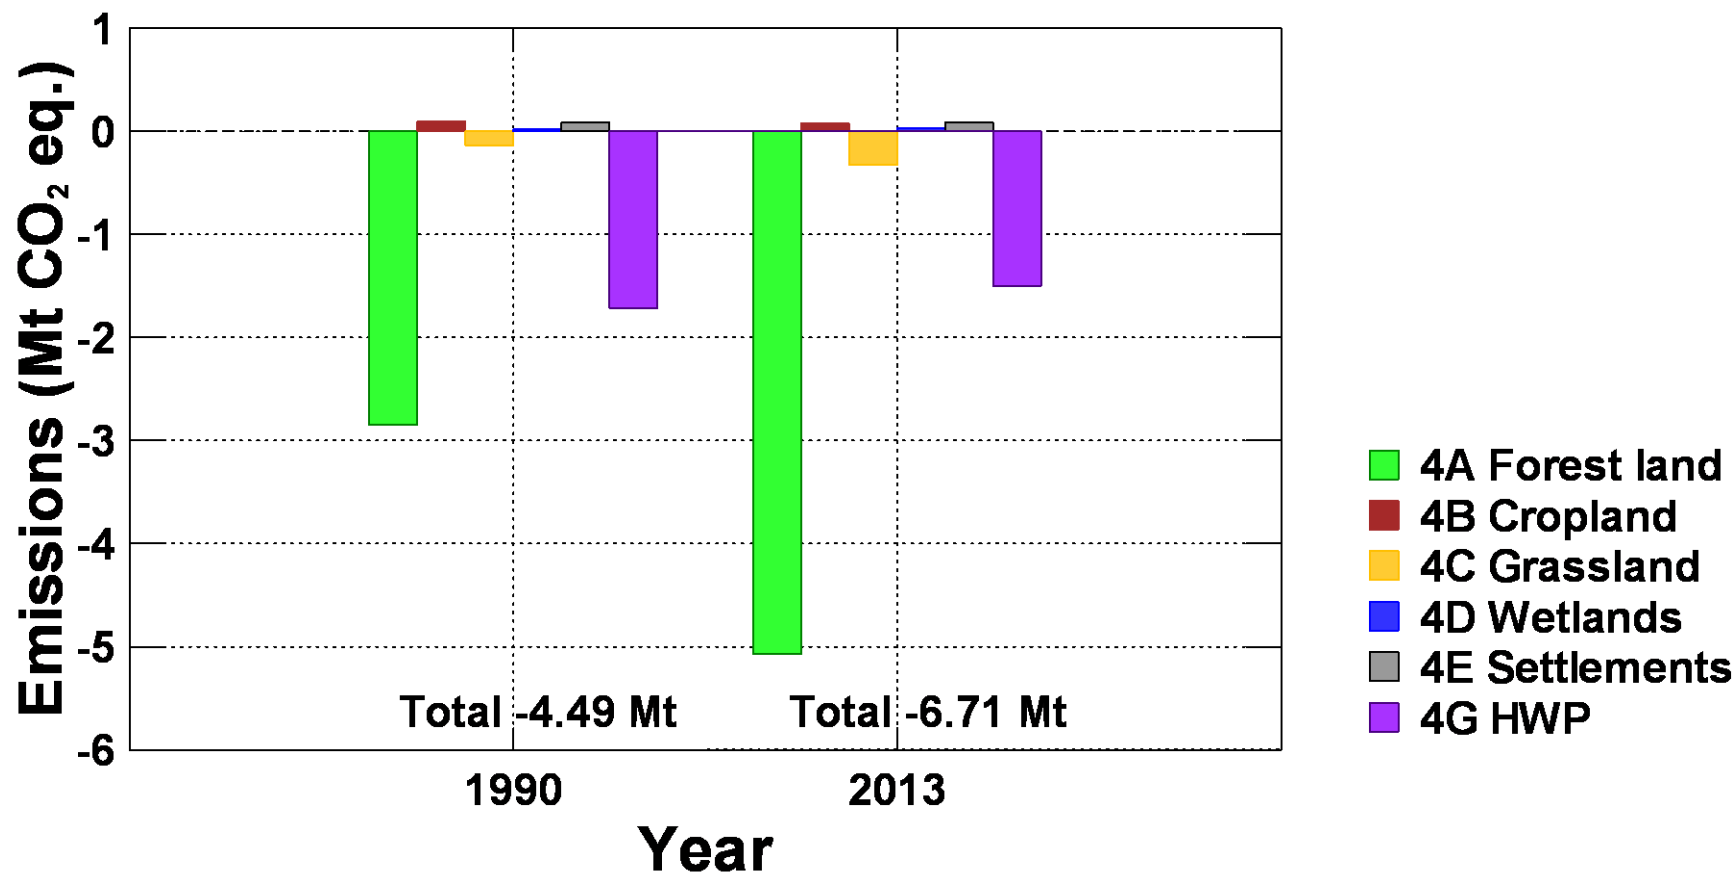

IFER – Institute of Forest Ecosystem Research,
Jílové u Prahy, Czech Republic

The Czech LULUCF estimates

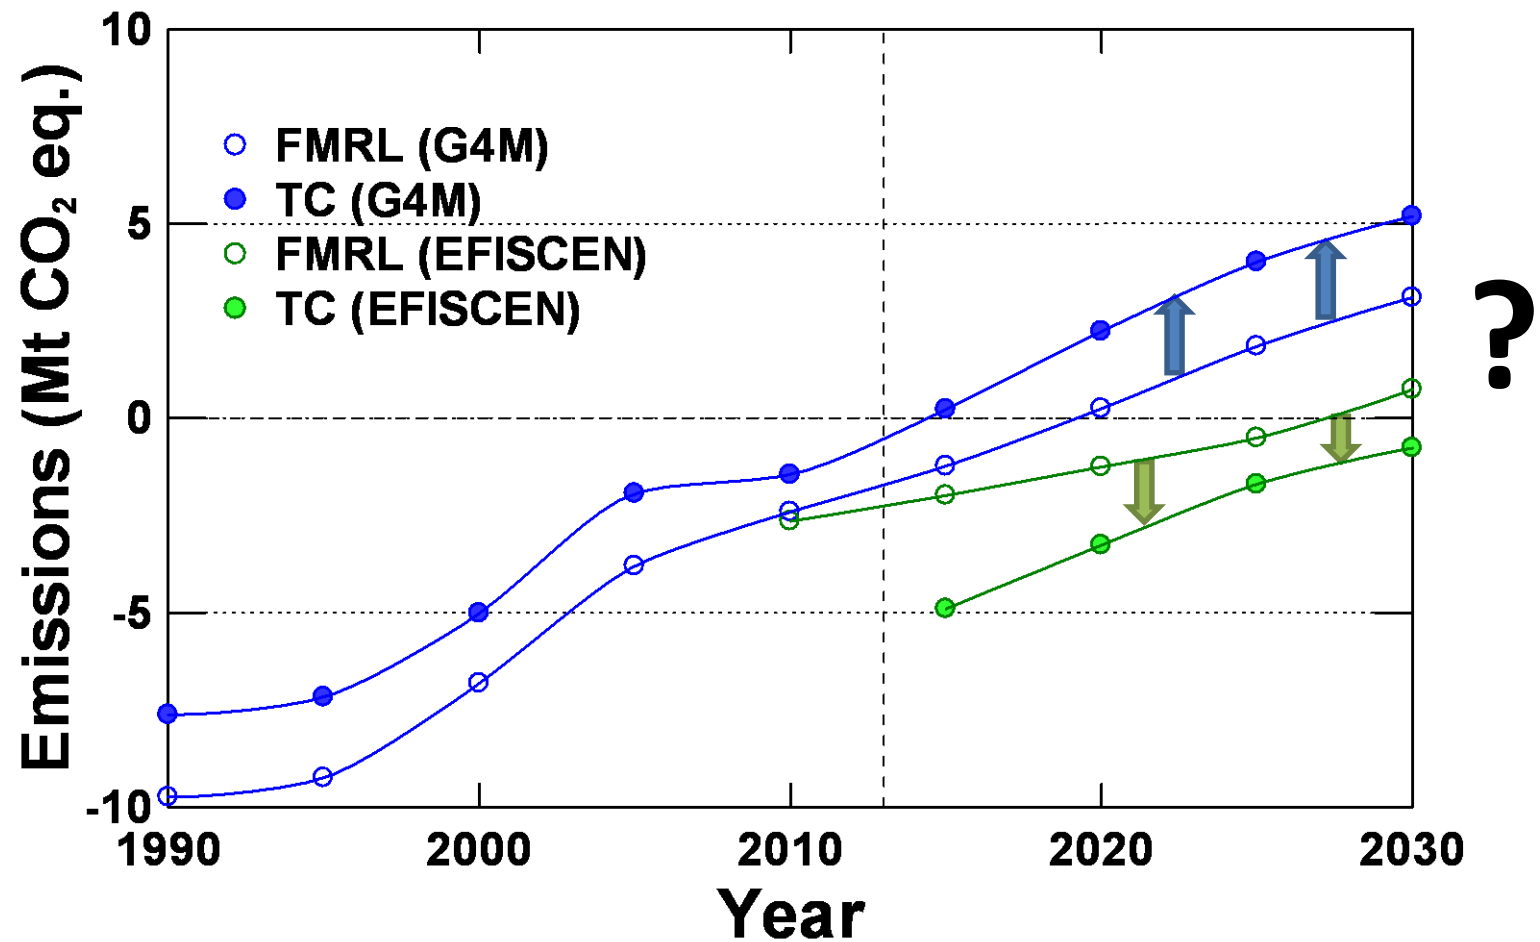

Czech LULUCF: 1990 and 2013

Issues of concern

- **FMRL and TC**
- **HWP under LULUCF and KP**
- **Reporting disturbance**

FMRL and TC

HWP

- Currently not correctly implemented in CRF reporter software (!?)
- Do we discern HWP fraction originating from Deforestation (and apply instant oxidation for emission estimates) under both LULUCF and KP LULUCF?

Spatially inexplicit disturbance
(managed by prioritized salvage logging)

Thank you!
