Juan José Rincón Cristóbal
JRC LULUCF Workshop
Arona, 28-29 May 2015

Aether 

The Aether logo consists of the word 'Aether' in a bold, italicized, white sans-serif font, followed by a graphic of four white circles of varying sizes arranged in a cluster.

Introduction

- The wiki is an extension of the existing platform used for the first KP commitment period.
- Re-design the platform:
 - consolidate the relevant material for:
 - the second Kyoto Protocol commitment period
 - 2015 MMR reporting
 - by reviewing the material, re-packaging and re-using the content of the platform related to the first commitment period which remain relevant for the second commitment period.
- Based on feedback for improvements and suggestions (evaluation questionnaire workshop 2006 IPCC GLs June 2014).

Focus

- Focus:
 - build capacity among MS for the preparation of the GHG inventories
 - harmonisation and comparability of national inventories among the MS
 - improve the user-friendliness
 - improving the structure and enlarging the content
 - have a repository of questions and answers that could be use as a FAQ by the MS

Settlement remaining Settlement

Louise Refalo 3 Oct 2013, 10:02

[Fold](#)

I would like to inquire on settlement remaining settlement. When the parameter of tree crown cover is not present what other parameter can i use? I have only available the total land area of the vegetated area.

[Reply](#)[Options](#)

Re: Settlement remaining Settlement

sandrof 3 Oct 2013, 21:52

[Fold](#)

Dear Louise,

could you clarify the issue? do you refer to wooden aboveground biomass only?

Sandro

Re: Settlement remaining Settlement

sandrof 28 Oct 2013, 08:33

[Fold](#)

For estimating stock changes in urban trees you have 2 options, crown cover or number of trees.

Whether you have not such information, an option is not preparing any estimate as tier 1, or having the total "green area" of your settlement, collecting data in some samples on the number of trees per hectare of green area, or the crown cover area of the "green area". From such samples you may derive the total number of trees or the crown cover of your total "green area" in settlements.

5 LULUCF workshop JRC Feb 2013

Cross cutting issues - Tracking technical workshops and meetings » 5 LULUCF workshop JRC Feb 2013

Last updated by  Juan Jose Rincon, on 19 May 2015, 13:26

JRC technical workshop on LULUCF issues under the Kyoto Protocol

Organized by the Joint Research Centre of the European Commission

27 February - 1 March 2013 in Ispra (Varese, Italy)

This workshop looked at ensuring better implementation of ERT's 2012 assessment reports and 2013's EU QA/QC checks. The workshop also discussed two short assessments prepared by the JRC on 'Current issues and implementation of "not a source" provision by EU's member states' and 'Methods used to report change in soils organic matter in mineral soils in conversion from FL to SL' that can be found as links from the JRC page.

Agenda and presentations:
[\[http://forest.jrc.ec.europa.eu/activities/lulucf/workshops/workshop-2013-1/\]](http://forest.jrc.ec.europa.eu/activities/lulucf/workshops/workshop-2013-1/)

Key Topics:

- Main issues identified during 2013 QA/QC cycle by the JRC (Viorel Blujdea, Raul Abad Vinas, Giacomo Grassi - JRC)
- Assistance to MS for implementation of KP reporting requirements
- The Nordic-Baltic LULUCF project
- Are we confident on LULUCF inventories? verification activities and uncertainties
- Overview verification activities
- The Carbon Budget Model to estimate forest C dynamics in EU MS
- Practical approaches on estimating uncertainties
- Portugal's new system for reporting land-use and land-use change
- Slovenia's land use change matrix
- Refining forestry in GHG inventories and projections: UK experience
- Tool for modelling GHG emissions related to forest management in Latvia
- Estimating temporal changes in carbon stocks of soil carbon, litter and dead wood with Yasso07
- LULUCF in The Netherlands
- Spain KP-LULUCF reporting
- Portugal- Reporting CM and GM activities
- Finland - FL to SL (D), soil carbon estimation
- LULUCF inventory in Hungary
- LULUCF sector in Lithuania

How to raise an issue

- First, see additional guidance and forums
- Specific issues raised by MS:
 - Confidential/Sensible: Send an email to the admin and they will post it as “Anonymous”.
 - In the forums:
 - Answers by other MS:
 - giving a solution
 - having the same problem
 - with similar, but not the same issue
 - Answers by the pool of experts
- Ad hoc questions dealt with by email directly
